SUMMARY

Highly skilled Flutter developer with experience in building, testing, optimizing, and maintaining Android/iOS apps. Proficient in Flutter/Dart, Firebase's suite of functionalities, state management (Provider, Bloc, GetX), and REST API integration with adeptness in MVC/MVVM concepts. Demonstrated strong problem-solving abilities, commitment to clean, scalable code and versed with Git/version control. Experienced in managing Play Store/App Store releases.

EXPERIENCE

SDE March 2025 – Present
Farmako • [farmako.ai](#) Gurugram, Haryana

- Developed Android/iOS apps with Flutter/Dart, integrated Firebase's suite including Authentication, Firestore, and push notifications.
- Implemented REST APIs and JSON integration, providing seamless functionality and data transfer.
- Integrated Firebase-based state management using Provider, Bloc, and GetX frameworks.
- Collaborated with UI/UX and backend teams to deliver scalable, high-performing apps.
- Employed Git/version controls for efficient code management, ensuring adherence to clean coding norms.
- Managed Play Store/App Store releases, maintaining exceptional app performance and user experience.

Flutter Developer July 2021 – March 2025
PuStack • [pustack.com](#) Remote

- Drew upon strong knowledge in Flutter/Dart to develop highly functional Android/iOS apps.
- Implemented REST APIs and JSON integrations for flawless data transfer.
- Integrated Firebase (Authentication, Firestore, push notification) for secure and efficient app features.
- Utilized state management frameworks such as Provider, Bloc, and GetX for effective state management.
- Used well-developed debugging skills to maintain high app performance.
- Demonstrated proficiency in Git and version control for efficient code management.
- Managed app releases on Play Store/App Store, ensuring high app quality and performance.

PROJECTS

MyMoney • [majesticui.com](#)

- Built the app using Flutter/Dart, integrating REST APIs and JSON for efficient data processing.
- Used Firebase (Authentication, Firestore, push notifications) to add secure and efficient features.
- Incorporated state management (Provider, Bloc, GetX) for effective handling of app state.
- Used strong debugging skills to improve app performance.

Majestic UI • Passion Project • [majesticui.com](#)

- Developed the app with Flutter/Dart, with integration of REST APIs and JSON for seamless data transfer.

- Incorporated extensive use of Firebase (Authentication, Firestore, push notifications) for feature integration.
- Implemented state management (Provider, Bloc, GetX) for effective handling of app state.
- Devised debugging strategies to ensure high app performance.

The CS Guy • Passion Project • youtube.com/@TheCSGuy

- Used advanced state management (Bloc, Riverpod, Provider) practices to build efficient Android/iOS apps with Flutter/Dart.
- Incorporated Firebase (Authentication, Firestore, push notifications) for secure and smooth app performance.
- Debugged and made improvements to maintain high app performance.

SKILLS

Flutter: Dart, state management (Provider/Bloc/GetX), MVVM architecture, testing and debugging, REST API and JSON integration, Firebase (Authentication, Firestore, push notifications)

Mobile: Android (Java, Kotlin), iOS (Swift), Play Store/App Store releases

Web: REST integration

Backend: Firebase

Source Control: Git, version control

Miscellaneous: Strong problem-solving, code scalability, collaboration

EDUCATION

Bachelors in Information Technology • RGPV University • Bhopal, MP • 2021 • GPA: 4.25/5.0
